EDUCATION

Covenant University <i>B.S. in Mechanical Engineering—GPA: 3.87/4.0 (in top 2%)</i> Background: Mathematics and computational methods Interests: Production ML, ML on Relational Databases, Knowledge graphs	Lagos, Nigeria September 2017 - July 2022
Courses Stanford: <i>Machine Learning with graphs (CS224W), Reinforcement Learning (CS234), NLP (CS224N)</i> Healthcare: <i>Global Health, Universal Health Coverage, Managing Field Research</i>	Remote/Online

EXPERIENCE

Data Science & Machine Learning <i>Tutor—Local Christian assembly: (Part-time)</i> · Created training notebooks and files for Data Analysis with R, Databases (MySQL) and MLOps (Docker, FastAPI, CLI scripts, CI/CD and deployment).	Lagos, Nigeria Sept 2023 – Present
Clinton Health Access Initiative <i>Data Support—Supervisor: Dr Chizoba Fashanu</i> · Developed Databases, Dashboards and Data collection tools for the Malaria and Essential Medicines Program. · Supported the implementation of Randomized Control Trials, field research and grant proposal development.	Lagos, Nigeria Jan 2023 – Present
Molecular Biology & Computations Lab <i>ML Researcher—Supervisor: Conrad Omonhinmin</i> · Conducted research on the application of Vision Transformers, CNNs, Knowledge Distillation, and Contrastive Learning Strategies in medical imaging. Led to a publication.	Lagos, Nigeria Aug 2022 – Jan 2023
The Energy and Environment Research Group <i>ML Student Researcher—Supervisor: Olayinka Ohunakin</i> · Created a novel filtering technique that is works by setting quantiles on the data distribution, this was applied for outlier filtration before modelling the Wind Turbine Power Curve. Led to a publication. · Created a novel statistical technique for detecting faulty wind turbines in a wind farm. It works by calculating the Euclidean distance between data bins and performing statistical tests on them. Led to a publication.	Lagos, Nigeria Oct 2021 - Aug 2022

PUBLICATIONS

[1]	Vision Transformers in Medical Imaging: A review , published 2022 Emerald Henry* , Onyeka Emebo, Conrad A. Omonhinmin
[2]	Conditional Monitoring and Fault Detection of Wind Turbines Based on Kolmogorov-Smirnov Non-Parametric Test , published 2023 Olayinka S. Ohuankin, Emerald Henry* , Ezekiel Victor
[3]	A Neural Network-Based Wind Turbine Power Curve Model Using Several Wind Farms' Influencing Parameters and Topography , (A Book Chapter) 2022 Olayinka S. Ohuankin, Emerald Henry* , Ezekiel Victor
[4]	Techno-economic assessment of offshore wind energy potential at selected sites in the Gulf of Guinea , published 2022 Olayinka S. Ohuankin, Olaniran J. Matthew, Windmanagda Sawadogo, Emerald U. Henry
[5]	Design and Implementation of the electrical system of a mini-racecar , preprint 2022 Emerald Henry

COMPUTATION PROJECTS

Food Classification App (CV) · Deployed a Vision Transformer model for classifying food types to Hugging Face using the Gradio web Interface.
Sentiment Analysis App (NLP) · Developed an app for sentiment analysis based on the RoBERTa model and using the Flask framework as API.
SQL FastAPI Integration App · Developed an application for collecting data and storing within a database using the FastAPI framework as API.
ML, MLOps and Data Science Tutorial · Developed a repository containing training notebooks and scripts for ML, MLOps and Data Science.
Quantile Filtering Algorithm · Created a novel wind turbine SCADA data filtration algorithm for cleaning out outlier or faulty wind turbine data.

LEADERSHIP & VOLUNTEERING

Hebron Motorsports Oversaw the manufacture of the first semi-professional racecar in West Africa, Designed the Electrical system
Enactus Contributed to the various social entrepreneurship initiative the Covenant University Enactus club carried out.

Skills & Achievements

Languages: Python, C/C++, R, Rust, SQL, CLI(shell, bash), YAML
Tools & Frameworks: Pytorch, OpenCV, Tensorflow, Keras, Git, LATEX, Docker, FastAPI
Achievements: <i>Best Project Award: CU 2022, Winner: Covenant University Covid-19 challenge (Top 5), Top 3, National University Entrance Examination.</i>
